

Right Care, Right Place, Right **NOW**

NOW OFFERING REMOTE TELE-ASSESSMENT ON YOUR SCHEDULE

We are pleased to announce that we have made it even easier for patients to connect to the care they need, when they need it. We now offer patient care assessments remotely, 24 hours a day, 7 days a week. There are three convenient options to be assessed by a licensed professional:

- **In person** – We still welcome in-person assessments, and are taking all necessary precautions by following CDC guidelines.
- **By telephone** – We can immediately assess patients over the phone to ensure reduced wait times and access to the right level of care.
- **By secure video conference** – We are happy to schedule a video appointment for patients who are able to access a computer.

We understand you have concerns about social distancing during today's difficult environment, and we want to eliminate any barriers to receiving needed care. Mental healthcare can't wait, and tele-assessment is one more way we will be there for our patients. Our inpatient programs have taken many measures to put our patients' health first, and we also offer teletherapy for our intensive outpatient programs. We want to ensure you or your loved one gets needed treatment, without delay.

Call us today to learn more.
