Chapter 1

Introduction

This report contains the data collected in your school(s) using the *Pride Surveys Questionnaire*. The report is organized as follows:

1. A Summary that provides you with the fundamental findings in an abbreviated and easy to read fashion.
2. Color Graphs that provide more expansive results from the survey in pictorial fashion.
3. A List of Tables which contains the complete findings of the survey. This section itemizes student responses by each grade level and each item scale (for example: never, seldom, sometimes, often and a lot).
4. A Narrative Report which includes both text and graphic images. This section also includes a sample news release.

Additionally, the report contains a special section entitled *Drug Free Communities Support Program*. This section was developed to provide the data needed to satisfy core measures required by the Drug Free Communities Support Program, administered by the Substance Abuse and Mental Health Services Administration. **NOTE:** Federal requirements have changed in regards to what questions should be used for reporting purposes. In particular, Past 30 Day Use is now calculated using a different question than has been used in the past. All references to past 30 day use will be based on the new questions.

It should also be noted that perception of harm and perception of risk measures similar constructs. Both of these sets of questions have been included in this survey to make it possible to compare to past data.

1.1 How To Use Your Data

- Meet the accountability requirements of federal and state agencies that your programs be evidence-based.
- Establish a needs assessment to design and secure funding for new programs.
- Conduct periodic performance evaluations for continuing programs.
- Encourage community-wide support for your programs.
- Determine why negative student behaviors occur by examining risk and protective factors.

We recommend that you share the findings of your survey with staff/faculty, administration, boards of education, elected officials, parents, community organizations and the news media.

While the findings are likely to show that certain problems exist within your student population, the overriding message will be that you are taking a fact-based approach to understand and solve these problems.

Chapter 2

Summary

Many federal agencies have identified certain data that are most important in measuring drug use and perceptions among youth. These data are often referred to as the *Core Measures* and consist of:

- **Reported 30-day Use** - the percentage of students who have reported use in the last 30 days,
- **Perception of Risk** - the percentage of students who reported that a drug was *harmful* or *very harmful*,
- **Perception of Parental Disapproval of Use** - the percentage of students who reported that their parents would feel it was *Wrong* or *Very Wrong* to use,
- **Perception of Friends' Disapproval of Use** - the percentage of students who reported that their friends would feel it was *Wrong* or *Very Wrong* to use,

for the drug categories of cigarettes/tobacco, alcohol, marijuana, and prescription drugs. The chapter entitled *Drug Free Communities Support Program Core Measures* will delve into these measures in detail. This section will briefly summarize these data.

Graphics

The following graphs will assist you in understanding the relationship of student behavior to alcohol and other drug usage. You are encouraged to make overheads or slides from the graphs for presentations to school faculty, parents, media, and other audiences in the community.

The *Location* and *Time* of drug use graphs will be helpful in understanding the need for a commitment to drug abuse prevention by parents and the larger community - not just by schools. Student alcohol and other drug use occurs most often outside the school and at times when school is not in session.

The *Perceived Harm* of alcohol and other drugs will assist with understanding how the false assumptions concerning harm are related to drug use. When drugs are perceived as harmless, the probability of use increases.

Research indicates that easy access, *Availability*, to drugs increases the probability of use. Availability of alcohol and other drugs normally increases at higher grade levels.

- Make Good Grades
- Take Part in Sports Teams
- Take Part in School Activities
- Get Into Trouble at School
- Teachers Talk About Dangers of Drugs

How students responded to each question is presented in table form. Students are then grouped based on how they responded to each question. The percent of illicit drug use for each subgroup is calculated and presented in graphic form. For example, if the bar for *Never* is at 40%, this means 40% of the students who marked *Never* reported using an illicit drug.

3.11.1 Attend Church or Synagogue

Students could respond to this question by marking Never, Seldom, Sometimes, Often or A Lot. The following table shows what percent of all students responded Never, what percent responded Sometimes, etc.

Seldom	13.1
Sometimes	19.8
Often	16.7
A Lot	28.3

Students are grouped based on how they responded to the question and the percent of illicit drug use in the past year is calculated for each group. For example, if the bar for *Never* is at 40% this means 40% of the students who marked *Never* reported using an illicit drug.

3.12 Safety and Health – Cross Tabulations

The following graphs and tables summarize some of the *Student Information* questions in regard to drug use. These data are calculated by examining specific subsets of your population. For example, a percentage is calculated for students who report carrying a gun and their liquor use. This percentage is calculated as follows:

$$\frac{\text{Number of those reporting carrying a gun to school and claiming to use liquor}}{\text{Number of those reporting carrying a gun and validly responding to the question *How Often Do You Use Liquor*}}$$

The *Ratio* describes the relationship between the groups examined on each graph. For example, in looking at Guns vs. No Guns if the cocaine ratio were 5.3, this would mean the percentage of students who report cocaine use was 5.3 times higher for students who report bringing a gun to school compared to those who don't.

Percentage Tables

This chapter contains your school survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data by grade level, grades 7 through 8 combined, grades 9 through 12 combined, and all grades combined. The *N of Valid* column contains the number of students who responded to the question and the *N of Missing* column contains the number of students who did not respond to the question. The remaining columns contain the percentages of students responding to the particular response categories.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each section is located. The List of Tables contains the location of each individual table.
